Shuttering Plywood

Platinum Plus Plywood

(Lloyds Approved British Standard BS 1088)

- Lloyds Approved from United Kingdom
- British Standard BS 1088
- Ideal for luxury furniture
- Made from tropical hardwood

Club Plus Plywood

- Manufactured as per IS 10701 standards, it is a structural plywood with more tensile, compressive and panel shear strength.
- Ideal for structural plywood for your home manufactured with A-Bond or B-Bond adhesives.
- High level of dimensional stability and long-term load-carrying capacity.

Marine Gold Plywood

- Ideal for exposure of water
- A grade core veneers
- 21 year warranty.
- IS : 710 Marine Grade

Austin Fire Defender

- Fire-related accidents can happen at any time and anywhere and we, at Austin Plywood, believe “Prevention is better than cure”. Thus, we have designed a plywood which is specialised in defending fire.
- Austin Defender - A fire-proof plywood that delays flame penetration through the sheet by at least 50 minutes.

Lincoln MR Grade Plywood

Lincoln MR grade plywood is made from unique quality selected veneers and exclusively used for home and office interior applications. This commercial ply is specifically treated to develop superior withstanding power against moisture, borers and termites. With 100% composed core, it fights high levels of humidity and even the water immersion test at temperature of 60+ /-20c for more than 21/2 hours.

Warranty:

The 5 years performance warranty is given due to the use of superior raw materials, advanced chemical process and humidity resistance formula.

Interiors:

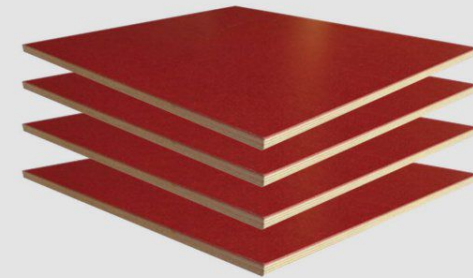

It is the best commercial plywood IS: 303; recommended for cabinets, chairs, tables, wardrobes and other furniture applications for home and office.

Film Faced Shuttering Plywood

- 9 layers of core veneers pressed together with a high-pressure pressing machine at high temperatures.
- The extra compression enhances the load-bearing capacity and the nail and screw holding properties of the plywood.
- Austin's Shuttering Plywood meets the specifications outlined by IS 4990, IGBC, and FSC.

Block Board

Platinum Plus

- Made from the best quality Meghalayan Pinewood.
- Used for marine construction.

Club Plus

- Uniform distribution of moisture and adhesive with pre-pressing technique.
- More durability and is warp-free.

Gold Marine Block Board

- Bonded with Resin of BWP Grade.
- Treated with a 3-tier preservative.

Others

WPC Board

- Austin WPC boards are eco-friendly and chemical-free.
- Raw materials are ethically sourced where no incident of deforestation is involved.
- A cost-effective, green alternative that can be recycled and reused at any point of its lifecycle.

Termite-Proof WPC Doors

- WPC doors have anti-corrosion, anti-aging, and anti-bacterial properties.
- These doors are zero warping, splintering and flexible enough to be given various shapes.

Flush Doors

- Austin Flush doors are made of superior material- Meghalayan Pine Wood.
- The material is water, borer & termite proof.
- Weather-proof and highly durable.

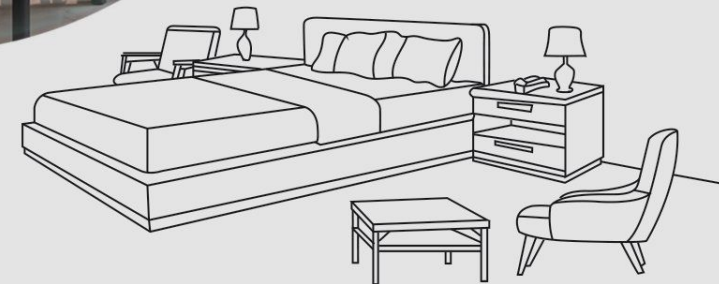

E-0 Certified

Most Plywoods are made up of Phenol and Formaldehyde which bring multiple health hazards like:

- Skin irritation, allergy, dermatitis and itching.
- Eye irritation which can cause conjunctivitis.
- Headache.
- Irritation and dryness of the nose and throat.

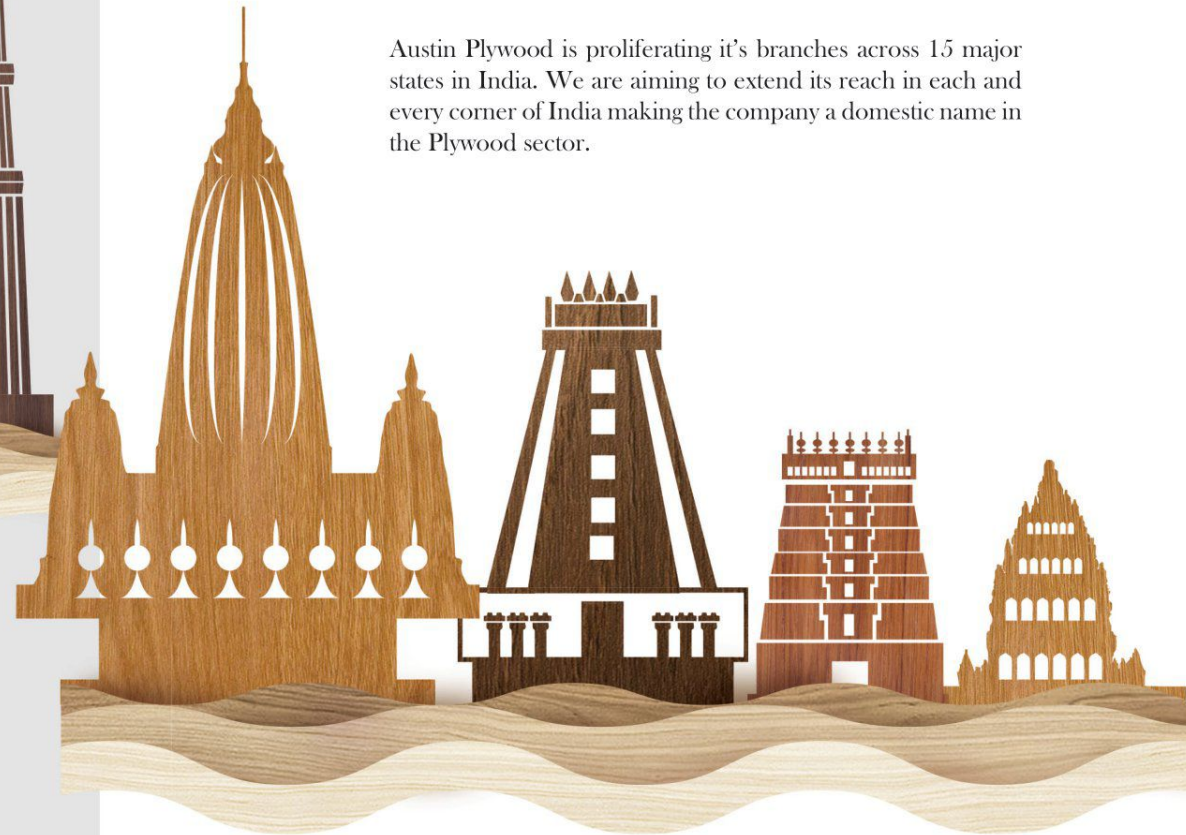

But, we use a glue in which the formaldehyde emission remains minimum enabling you to breathe in clean air.

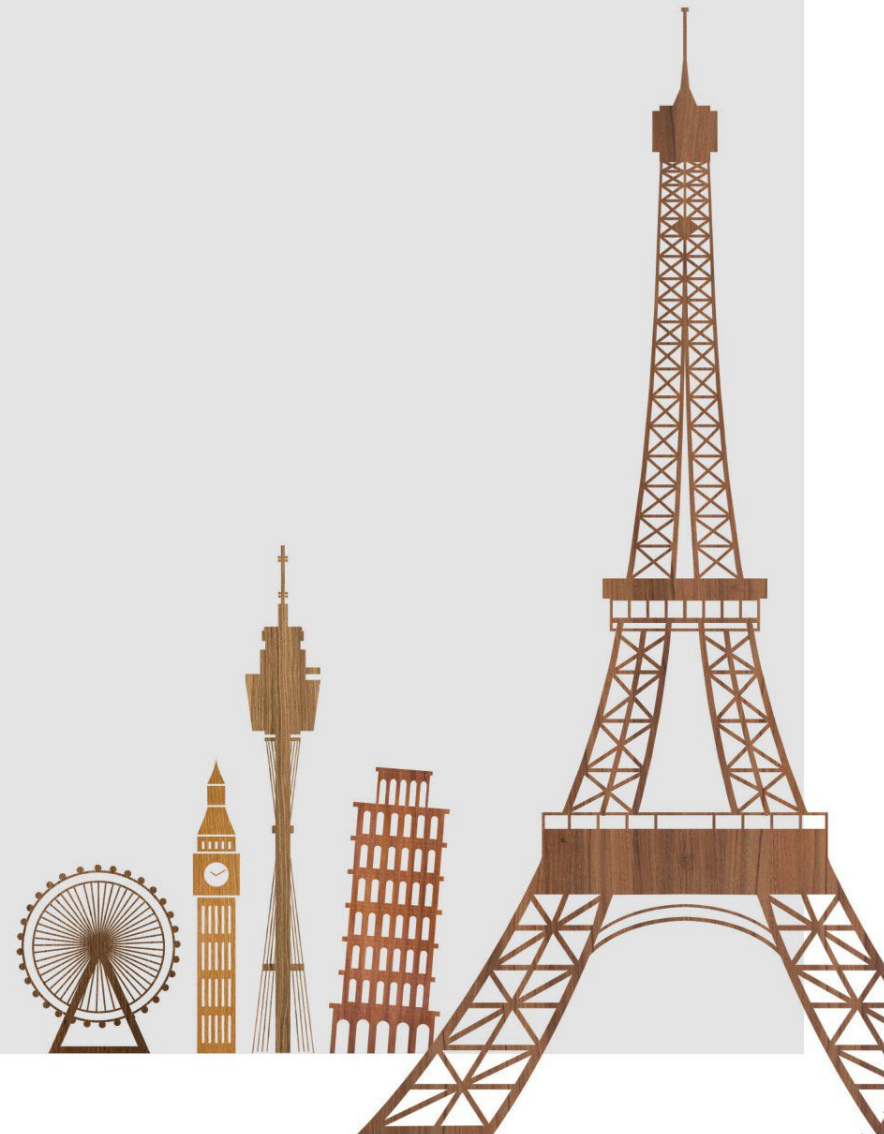

PAN India Presence

Austin Plywood is proliferating its branches across 15 major states in India. We are aiming to extend its reach in each and every corner of India making the company a domestic name in the Plywood sector.

Global Presence

Austin Plywood, one of the most promising brands of Asia, has its presence across 21 countries worldwide. With the constant development towards perfection and manufacturing better quality plywood using superior materials, we will soon reach the pinnacle in the global market scenario.
