COMPANY OVERVIEW

For years Asia's leading brand of laminates, Greenlam has manufactured products which promises to perform beyond comparison. From developing technology to designs with superior functionality, Greenlam has always received appreciation from the industry and customers across the globe.

Backed by ISO 9001, ISO 14001, OHSAS 18001 awards for offering advanced product line along with world-class working systems, Greenlam has also received global recognitions, namely –NEMA,BS and EN-438 for meeting rigid international standards, it has also received recognition with the prestigious GREENGUARD certifications for producing eco-friendly and sustainable products.

With Greenlam Sturdo it offers you an exceptional restroom space and locker solutions range which gives a complete solution for adding a spectacular look.

ENGINEERED TO PERFORM

Greenlam Sturdo is an incredible assortment of restroom and locker solutions, embellished with Raw Silk Finish and Anti Bacterial Laminates. It also offers specially adapted Hand Holds for physically disabled and impressive privy Divider Panels which are extensively used for commercial applications and in public areas.

Engineered under indigenous technology, Greenlam Sturdo performs exceptionally even in heavy traffic areas, under high moisture and high humid conditions. Its unique product composition makes it suitable for Indian climatic conditions where toughness, performance and strong visual appeal becomes essential. The company has also paid special attention to the needs of the physically challenged by additionally designing restroom space products in accordance to the ADA (Americans with Disabilities Act, 1990) guidelines. Since customer satisfaction is the utmost priority we make sure that our extensive range of restroom products and Lockers are available on a proper supply basis to ensure timely distribution and installation by our competent technicians. Along with our dedicated after sales service support we also offer an assurance of unprecedented 10 years of warranty on our range of compact laminates against any manufacturing or moisture related defects.

Not just beautiful, these laminates make the surfaces of restrooms and lockers germ-free and secure. Produced by permanently incorporating a US-EPA approved, well-known and widely used anti-microbial agent during the manufacturing, this range ensures complete health and hygiene for you and your family. Wish you a happy and healthy life ahead!

GREENLAM STURDO RESTROOM CUBICLES AND LOCKER SOLUTIONS

Presenting a new world of restroom cubicles and locker solutions studded with innovative designs and unique features. A remarkable collection of divider panels, doors, locker solutions and restroom cubicles are available in various styles and ranges.

FEATURES

- Available in anti bacterial grade
- Exclusive raw silk finish available
- Manufactured in accordance to ISO 2046
- Formulated by using superior quality high pressure compact laminates
- Built with nylon polyamide, stainless steel and aluminum hardware fittings
- Available in standard and special dimensions to cater to the needs of physically disabled people
- These restroom cubicles and locker solutions are available in various sizes, shapes and colour hues
- Designed for providing better durability and performance
- Hygienic and easy to maintain
- Variety of Restroom Cubicles for kids
- Also offers designer cut cubicles for more aesthetic appeal

ADVANTAGES OF GREENLAM STURDO

- | | |
|--|--|
|  Hygienic and easy to maintain |  High wear and abrasion resistance |
|  Resistant to harmful germs and cleaning agents |  Manufactured in strict adherence to accepted fire Safety norms |
|  Noise deafening system to avoid disturbing "door banging" sound |  Best in class international accessories |
|  Wide spectrum of colours to choose from |  Equipped with emergency opening provisions |
|  Resistant to cigarette burns |  Exceptional water, humidity and high temperature resistance |
|  High quality Compact laminates manufactured as per international standards |  Germ-free anti-bacterial laminates |

WET VS. DRY RESTROOM SYSTEM

Wet restroom system is the conventional way of setting up a restroom. It generally comprises of a structure made from brick walls and tiles coupled with the required hardware. One of the major drawbacks of a wet restroom setup is that the partition walls and doors are placed on the floor hence it becomes more prone to water, dust, dirt and stain settlements which leaves a pungent smell. In case of dry restroom, it's equipped with modern designing and is a reasonably priced setup. The main advantage of having this system is economy of space, usage of 12 mm/18 mm thick partitions and doors in comparison to 150 mm brick walls. There is always a gap maintained between the ground and the partition to avoid dust, dirt and pungent smell.

WHY PREFER A DRY RESTROOM SYSTEM?

Greenlam Sturdo stays class apart due to its usage of dry restroom system. An analysis to support the following is mentioned below:

DISADVANTAGES OF WET SYSTEM

- Cleaning of floor becomes difficult
- Dirt and stains easily settle down on the bottom because of its porous surface
- Tile designs can go out of production making its replacement difficult
- Since the grout joints are porous they can easily absorb pungent smell
- Loss of space - Usage of 6' x 6" thick walls result in loss of 3 sq.ft area per partition
- Load of building is high
- No means of natural ventilation is provided

ADVANTAGES OF DRY SYSTEM

- Economy of space- The partition panels are only 12 mm or 18mm thick as compared to 150mm thick brick wall
- Economy of load- Partitioning systems reduces the load on building as compared to the usage of brick wall
- Reduced installation time- 4 cubicles can be setup in a day
- Neatness- Since no wet work is involved
- Proper air ventilation access is provided in the designs
- Easy floor cleaning- Absence of corners doesn't let the dust to accumulate on the floor
- Vibrant range- Available in different colours and patterns

MATERIAL COMPOSITION

Compact Laminate construction

Greenlam Sturdo collection is formulated by using high pressure, self-supporting, decorative-Greenlam Compact Laminates. Its surface is composed of sheets of decorative paper impregnated with melamine resins and the thickness is achieved with sheets of kraft paper which are infused with thermosetting resins. These sheets are then bonded together by means of heat and high pressure, to make it resistant to stains, extreme temperatures, water, moisture, etc.

Thus, the incomparable distinctiveness of Greenlam Compact Laminates make them ideal for both horizontal and vertical applications where the surface should be functional, durable and decorative.

Adding to that Greenlam Compact Laminates are made anti-bacterial by permanently incorporating a US-EPA approved, well-known and widely used anti-microbial agent during the manufacturing.

HARDWARE DETAILS

To maintain the right balance between performance, economy and aesthetics, Greenlam Sturdo offers you an assortment of hardware fittings. Developed from high quality imported materials, the hardware fittings are available in nylon polyamide, aluminum and stainless steel finishes.

The stainless steel hardware is accessible in two distinct options. They both possess different characteristics which make them suitable for diverse applications.

SS Grade 304 is the standard "18/8" stainless steel. It is the most adaptable and widely used stainless steel, available in various forms and finishes. It has an excellent forming and welding characteristics. And while welding thin sections, post-weld annealing is not required due to this. The balanced austenitic structure of SS Grade 304 enables it to be severely deep drawn without intermediate annealing which has made this grade dominant in the manufacture of drawn stainless parts such as sinks, hollow-ware and saucepans.

SS Grade 316 is an improved version of SS Grade 304 since it additionally consists of molybdenum and slightly higher nickel content. The composition of SS Grade 316 gives the steel much increased corrosion resistance in many aggressive environments. Molybdenum makes the steel more resistant to pitting and crevice corrosion in chloride-contaminated media, sea water and acetic acid vapours. SS Grade 316 offers higher strength and better creep resistance at higher temperatures than SS Grade 304. And performs remarkably at sub-zero temperatures due to its excellent mechanical and corrosion properties.

KIDS' COLLECTION

Taking fun a notch higher

Our kids' collection opens up a new world of fun, excitement and adventure with stylish designs.

These cubicles are suited to infant school environments and are versatile with three standard models that make them ideal for nurseries, junior and senior schools.

The optional arched tops to the doors and shaped partitions create a washroom environment that is imaginative and artful whilst providing the necessary requirements for supervisory care.

These cubicles can be manufactured in any combination of colours from the exhaustive colour range and come complete with complementing hardware in stainless steel finish.

Available Models

- Kiddie World
- Crazy Balls
- Picket Fence

KIDDIE WORLD

- On special demand, overall height of restroom cubicle can be increased up to 2100 mm

CLASSIQUE-GRANDEUR

Give your restroom space the feel of eternal magnificence with Classique's 18 mm shoe box up series-Grandeur. Formulated by using 18 mm thick Compact Laminate to provide greater strength to the cubicle setup because of which the top rail arrangement becomes avoidable. Therefore, its composition creates a clear space at the top and user's height doesn't become a constraint. An inspiring range of restroom cubicles especially built for providing higher durability and easier height adjustments. Its easy to operate height adjustments are hidden inside the stainless steel box up, located at the foot of each pilaster. Thereby making it a truly adaptable system that can vary in height to suit the site's requirements. This model is recommended for airports, commercial complexes, sports clubs, stadiums and gyms as it is highly in demand for people who are tall.

The stainless steel box up is available in SS Grade 304 and 316 options. The intermediate panels are fixed onto the wall with stainless steel (Grade 304) U-channel section and SS 304 screw inserts.

HARDWARE DETAILING

Each restroom cubicle is equipped with the following set of hardware fittings:

DIMENSION DETAILING

Standard Dimensions	General (mm)	Physically Challenged (mm)
Width of cubicle	1000	1500
Depth of cubicle	1500	1750
Height of entire cubicle	1840	1840
Width of door	600	900
Height of door	1710	1710
Ground clearance	110	110

Note:

- Only Classique's 18 mm box up series-Grandeur is available without the top rail arrangement.
- The shoe box up model and adjustable foot are available in two options-stainless steel Grade 304 and 316
- On special demand, overall height of restroom cubicle can be increased up to 2100 mm

CLASSIQUE- VERSATILE

Classique's new variant-Versatile is developed for providing higher endurance and spectacular design.

Magnificent design united with great functional features makes it an innovative restroom series offering uncompromised quality at an economical price along with extraordinary benefits. Engineered with 12mm thick high pressure Compact Laminate, this model comes with the combination of stainless steel hardware with extruded anodised aluminum top rail and fixing channels. Thus, it's a valuable choice for users who desire a highly adaptable restroom space, preferred across the globe for its budget effective product detailing and matchless quality.

VIBRANCE

For the everlasting fresh look, Vibrance series offers the perfect combination of functionality and design. Vibrant colours of Compact Laminate accentuated in varied colours of polyamide fittings, is one of the unique feature of this series.

This series brings maximum solution for high wear and tear prone areas like hostels and institutes which require robust build quality. To cater to different architectural layouts and traffic volumes, Vibrance series is equipped with models which can be used-with and without pole construction (Depending on the wear and tear) and for retrofit projects where restroom space comprises of existing walls.

To complement our 12 mm thick Compact Laminate range of different woodgrains and solid colours, hardware fittings for Vibrance series are available in Black, Grey, Cream, Rustic Brown & Champagne colours. With myriad design options this series can be classified into 4 models.

- **Rage**
- **Serene**
- **Elegance**
- **Splendid**

VIBRANCE RAGE

Rev up the elegance of your washrooms.

Greenlam Sturdo brings you, Vibrance Rage, a new addition to the Vibrance collection, crafted to redefine the grace of your restrooms. The unmatched blend of functionality and classically, these contemporary cubicles are prepared from extruded anodized aluminum hardware studded with urbane colors and Gun Metal finish. To enhance the exquisiteness, all doors are 12 mm thick with chamfered edges. So, go on and make your washrooms, a masterpiece of exclusivity. Available in 2 earthy shades: Rustic Brown & Champaigne.

ALUMINIUM DOOR STOPPER CHANNEL

VIBRANCE-SERENE

Presenting serenity and simplicity at its finest, the Vibrance's Serene series is the typical model for restroom cubicles which provide easy construction and high durability. The Serene cubicle model is aesthetically designed with the extruded anodised aluminum top rail and polyamide hardware, for giving a clean and a lean look to the restroom setup. Its intermediate panel comprises of one undivided piece and has no joints in between. All pilasters as well as doors are 12 mm thick with chamfered edges. Thus, for those who like minimalistic designs, Serene is the answer.

Ground clearance	150	150

VIBRANCE- ELEGANCE

When restrooms are subjected to heavy footfall and usage, the chances of damage due to extreme wear and tear become greater. Thus, add a touch of elegance and class to your restroom space with a model which offers sturdiness and durability. The core strength of this model lies in its robust aluminum pole construction which makes it suitable for heavy traffic areas and high vandal prone environment like multiplexes, commercial malls, etc. The pole construction not only provides better strength but also adds to the design by breaking the monotony of single colour usage.

PRESENTING

LOCKER SYSTEMS

UNLOCKING THE WORLD'S BEST LOCKER SYSTEMS

Greenlam Sturdo lockers open up a new generation of locker rooms. A world of ultra-modern and exceptionally smart storage solutions made using Greenlam Compact laminates.

Brilliantly designed and widely durable, they are suitable for high humidity areas such as fitness clubs, sauna rooms, swimming pools, retail environments and sports centers.

Available in a wide range of styles, sizes, configurations and colors to achieve a perfect match with your services and interior designs. These systems are extra-tough, environment-friendly, easy to install and even easier to use.

What's more, they come with unique Anti-Bacterial property that makes them a superb choice for hygiene concern areas.

KEY HIGHLIGHTS

- Made using Anti-Bacterial compact laminates (3 mm and 9 mm)
- Made using heavy duty Aluminium channel
- Provision of 3 locking systems
 - Customer lock
 - Inbuilt lock
 - Keyless lock

Comes with an option of different base mechanism

- Stainless Steel leg base
- Compact Laminate base
- Concrete base

ONE LOCKER MANY BENEFITS

- Greenlam Sturdo locker systems offer excellent hygiene properties as these are made using path-breaking Anti-Bacterial Compact Laminates
- Effectively restrain the growth of bacteria
- Highly resistant to wear and tear, ideal for application where frequent cleaning is necessary
- With greater dimensional stability and flatness
- Easy to maintain, can clean stains by water or liquid detergent
- Exceptionally durable and cost-effective
- Excellent scratch resistance, acid resistance, alkali resistance, corrosion resistance and more
- Suitable for heavy-duty use
- Discoloration-resistant

LOCKER COMPONENTS

HINGES

Greenlam sturdo locker door hinges are of a patented, vandal-proof design that is integrated into the aluminum frame and carries a lifetime warranty. The door opens at a wide 175 degree angle for easy access and each locker is self-ventilated around the perimeter of the door where it meets the frame.

HINGE

DOORS, WALLS AND PARTITIONS

Greenlam sturdo locker doors, walls and partitions are made from solid phenolic HPL, an environment friendly but extremely durable material manufactured under high-pressure.

STRUCTURAL CHANNELS

Aluminum Profile

Greenlam sturdo locker systems mutually integrated frames, threaded connectors and "plug & screw" assembly eliminates the need for glue or permanent fastenings. The result is a completely modular system: less expensive to ship, easy to install, ideal for retrofit and remodel and can be easily disassembled and reassembled with no compromise to the materials.
