

DIGITAL DOOR & FURNITURE LOCK

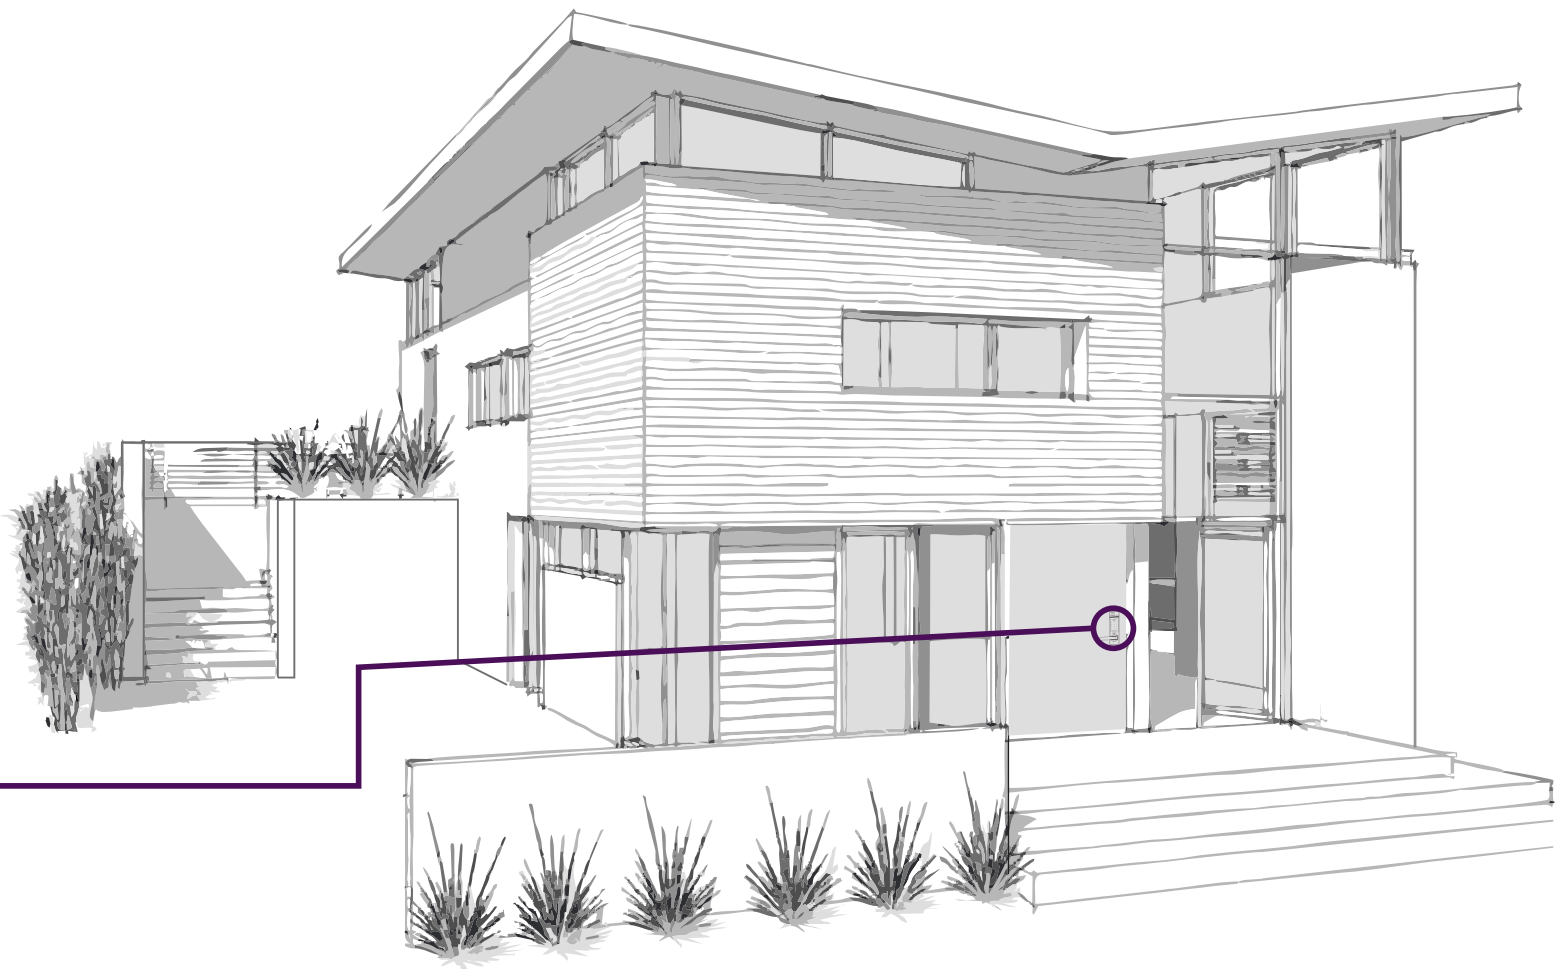

We are Dorset, an ISO 9001:2015, EMS 14001 :2015, BS OHSAS 18001:2007 organization with over 2 decades of experience as a reputed manufacturer of architectural hardware and provider of high security locking solutions. We combine new age aesthetics with cutting edge technology. The result is a range of path-breaking products that redefine functionality, reliability and durability. Our collection includes door handles, door locks, lock accessories, security systems, door control devices, glass hardware, door accessories and electronic safes covering all sectors including homes, offices, establishments and industrial facilities. Besides adding new segments to our existing range we are in the process of expanding our international presence and further enhancing our quality standards by equipping ourselves with the powers of Automation, Emerging Technologies backed by a full-fledged research unit comprising four independent R & D cells dedicated to ushering in tomorrow, today. At the heart of it all is our understanding of the evolving technological scenario and changing consumer needs. We understand that in order to stay ahead we have to keep innovating to keep delighting our customers.

profile

When your place is the Signature
to an immaculate lifestyle...
then the access to it
should be a statement.

DIGITAL DOOR LOCK

Over the years, progress in lifestyle has led to a bigger role for the traditional key beyond ensuring home security and determining who gets in and who stays out. Today the key has evolved to become an intelligent and integrated digital device that provides higher security, greater convenience and smarter living.

ACCESS

A dark grey, modern-style door is centered in the frame. It features a digital keypad lock on the left side with a silver handle. To the right of the door, there is a small, rectangular peephole in the wall. The door is set against a light-colored wall with a white baseboard. The floor is a light, reflective surface.

ONE'S

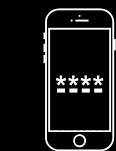

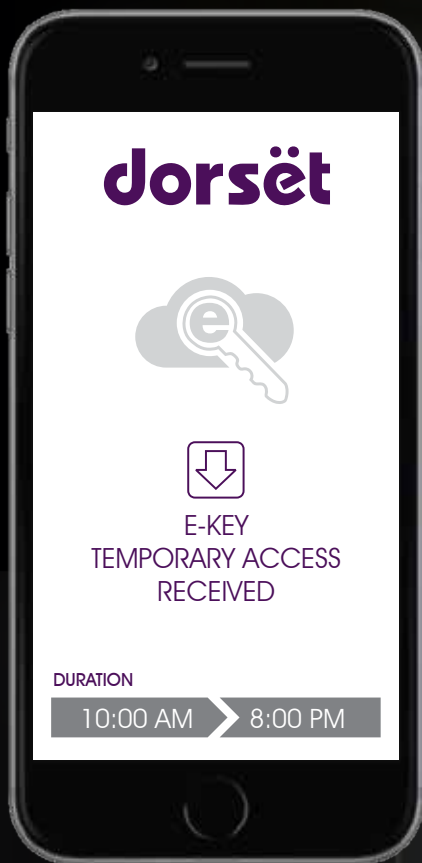

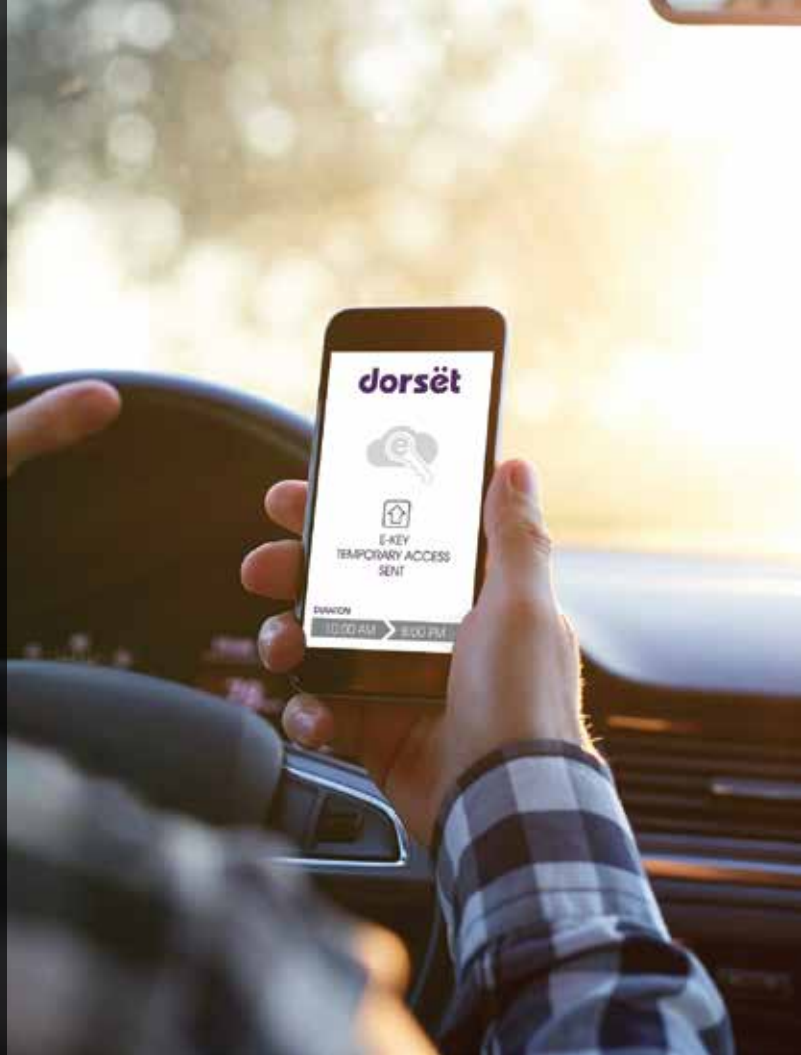

Slim Design

Cloud based E-Key System

A revolutionary new technology invented and made available for the first time ever in digital door lock security. This function allows sending tailor-made access rights to anyone through a smart phone. There are various type of E-Keys available suiting various situations and needs - One-time, recurring, permanent, time-sliced duration type of keys. Our cloud based E-Key system allows for real time one time Passwords (OTP) for guests to access the lock while using the same for various situations.

OTP ACCESS

GUEST ACCESS

TEMPORARY ACCESS

PERMANENT ACCESS

Our Unique Mobile Application with an intuitive user Interface gives various user notifications when a registered family member accesses the home. Our Unique Cloud Key system is also ideal for guests and short-term tenants. The property owner or host can issue e-keys from anywhere in the world and conveniently manage access rights through, their smart phones.

Locking Modes

Auto Locking

The Auto Locking mode is a function, which enables the door lock to get locked automatically 2 – 9 seconds after it closes. Our selective feature of time adjustment gives the user the flexibility of auto locking as per his needs. You only have to shut the door and leave, the worry behind regarding home security if this mode is activated.

Privacy Locking

The Privacy-Locking mode is a function that enables restriction of access from outside once this mode is activated. It is as simple as you pressing the button for 5 seconds and the function turns on with a beep restricting anyone's access from outside the door at any odd hour of the day.

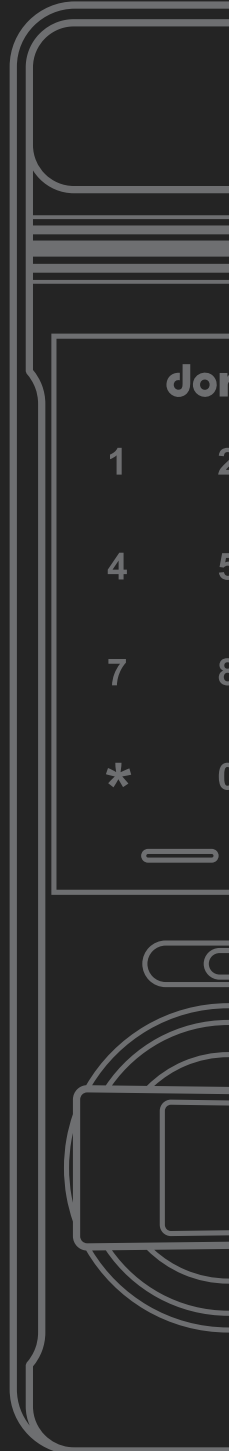

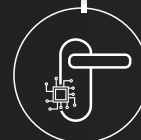

Remote Control

Dorset DG Digital Door Locks come with an option to operate with a smart looking wall hanging Remote Control giving you the convenience to open the door lock from wherever you are sitting at home.

Manual Locking Mode

The Manual Locking mode is a function that enables manual locking in areas that are used more frequently and do not require locking every time it is accessed. It is a simple to use convenient feature wherein the user has to physically lock the door by touching the lock button whenever required. For instance if there is a party in the house where the door is frequently accessed by guests this feature comes in very handy to ensure the door is not locked every time a guest is using the door.

Low Battery Alarm

Low Battery Alarm sets off when installed batteries are drained, reminding you to change batteries; the keypad lamp and a low battery alarm start to inform you about the battery change 7 Days prior to the estimated discharge period.

Fire Detection Alarm

Fire Detection Alarm sets off when heat detection sensor detects heat ($60^{\circ}\text{C} \pm 10^{\circ}\text{C}$) inside the room, and the door lock automatically opens to ensure free passage.

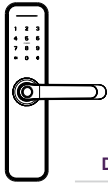

Lock Engage Alarm

This alarms sets off if the deadbolt of the lock is not engaged properly and the door remains unlocked, the door lock makes three attempts to open and it generates a Lock Engage Alarm to alert.

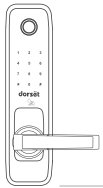

Intrusion Alarm

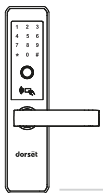

The Intrusion Alarm sets off in case the lock detects an intrusion from outside the door lock by some force that is not required to open the door in usual conditions.
